KELLY ANN HEILMAN

Laboratory of Tree Ring Research
kellyannheilman@gmail.com ◇ www.kellyheilman.com

EDUCATION

University of Notre Dame *August 2013 - 2019*
PhD
Department of Biological Sciences

Kenyon College *August 2008 - May 2012*
Bachelor of Arts, Biology and Environmental Studies. Magna cum laude

RESEARCH EXPERIENCE

Postdoctoral Research Specialist – USDA Forest Service/ORAU ***2023 - present***
As part of the Forest Inventory and Analysis program Carbon Science Group, I am developing reproducible national frameworks to integrate FIA inventory data with tree ring data, and parse drivers of tree growth and mortality.

Postdoctoral Research Associate – University of Arizona ***2019 - 2023***
Laboratory of Tree Ring Research.
I assimilate two large data sets in a state space modelling framework: repeat censuses from the Forest Inventory and Analysis and annual tree ring growth records. We use this framework to forecast forest carbon stock and flux across the Interior West US, evaluate forecast uncertainties, and inform forest management.

PhD Graduate Research Assistant – University of Notre Dame ***2013 - 2019***
My PhD explored how environmental changes affect both the large-scale distribution of forests, and treelevel responses to drought. Specifically, I quantified how historic changes in land-use, climate, and CO2 impacted the stability and drought tolerance of the temperate savanna-forest biome boundary using historic spatial datasets, Bayesian modelling, dendrochronology, and stable isotope geochemistry.

Aquatic Research Technician – Cleveland Metroparks ***2012 - 2013***
Performed both fish and aquatic invertebrate sampling for restoration and management. Led ecology field trips, and contributed to outreach events.

Toucan Research Assistant – CATIE, Costa Rica ***2013***
Tracked range and seed dispersal of toucans to support the dissertation research of Dr. Landon Jones.

Kenyon Summer Science Research Scholar – Kenyon College ***2011***
Investigated the impacts of climate change on reproduction success of a threatened minnow species.

GRANTS AND FELLOWSHIPS

National Science Foundation Doctoral Dissertation Improvement Grant DEB-1701897. *2017*

Center for Environmental Science Technology (CEST) Bayor Fellowship *2017*

UNDERC Mentoring Fellowship *2017 2018*

Arthur J. Schmitt Leadership Fellowship *2013-2019*

Leslie Douglas Frye Scholarship to Attend Kenyon College *2008-2012*

Dr. Kirby Walsh Sullivan Scholarship for Promising Students in Science *2009-2012*

TEACHING AND PROFESSIONAL EXPERIENCE

World Dendro Workshop: Forest growth and carbon with uncertainty from tree-rings and census data ***July 27th, 2025***

Livingstone, Zambia

Co-organized a one-day workshop with 15 participants on combining tree ring data with forest census data. In this workshop, I co-created and led a tutorial that demonstrates the value of combining tree ring and census data to estimate forest growth, biomass, and forest Carbon using a Bayesian state-space modeling approach. We developed a workshop website, using github to share code, data, and results examples, which provided both a "no-code," and an R code opportunity to engage with the material, to reduce barriers to learning these methods, and increase access.

Dendroecology and State-Space model workshop ***Nov. 2023***

University of Arizona

Co-organized a three day workshop with 40 participants on combining tree ring data with forest inventory data. In this workshop, I created and led a code tutorial for fitting Bayesian state-space models of tree growth, (publicly available on github), presented a research seminar, and worked with participants to include their data into similar analyses.

Conservation Biology 406/506 - Instructor ***Spring 2022***

University of Arizona

Instructor of record for Conservation Biology, a 400-level undergraduate course, and 500-level graduate course cross listed in Ecology and Evolutionary Biology, and School of Natural Resources and the Environment

Guest lecture in DISC (Dendrochronology Intensive Summer Course)

University of Arizona, Laboratory of Tree Ring Research – June 2022

Invited guest lecture on ecological forecasting and uncertainty quantification in dendroecology.

Guest lecture in Forest Ecology Class

University of Arizona, Laboratory of Tree Ring Research – Fall 2021

Guest lectured and led discussion on the topic of forest carbon fertilization.

Guest lecture in Graduate Seminar on Ecological Forecasting
University of Arizona, Laboratory of Tree Ring Research – Fall 2019
Guest lectured and led discussion on a Bayesian State-Space model, Intro to Bayesian Statistics, and led discussion on the role of Ecological Forecasting in our own research.

Workshop on Introduction to Bayesian Statistics in R
University of Arizona Research Bazaar – May 2020 and May 2021
Developed and taught a workshop on an introduction to Bayesian Statistics and how to implement simple Bayesian models in R. All course materials are available on github.

General Ecology Lab Lead Teaching Assistant ***2018***
University of Notre Dame
Contributed to ongoing course development by creating new lesson plans and leading writing workshops for students. I also assisted the Teaching Assistants with lessons, leading field trips, and developing student writing skills.

General Ecology Lab Teaching Assistant ***2014, 2016, 2017***
University of Notre Dame
Prepared fieldwork experiments and discussions, lead field trips, advised students on data analysis, developed student scientific writing and intellectual virtues, and graded all material.

UNDERC Summer Course Research Mentor ***2017-2018***
Notre Dame Environmental Research Center
Mentored five undergraduate students on independent summer research projects. This included teaching the students dendrochronology methods, forestry field data collection, implementing statistics using R, and the scientific writing process.

General Biology Lab - Teaching Assistant ***2013***
University of Notre Dame
Prepared introductory lectures, set up lab equipment, advised students on independent research projects, and graded all assignments.

Aquatic Systems Biology - Laboratory Teaching Assistant ***2011***
Kenyon College
Teaching duties included organizing lab materials, bringing students on field expeditions, and teaching students aquatic ecology methods.

Introductory Biology Lab - Teaching Assistant ***2010-2012***
Kenyon College
Assisted instructor in preparing lecture and experimental design, and led students through experimental protocols.

Introductory Biology Lab and Microscopy Lab Preparation Assistant ***2010-2011***
Kenyon College
Prepared lab materials for each lab meeting, and helped to develop lesson plans each week.

VOLUNTEER AND SERVICE

Organizational

Ecological Forecasting Initiative Conference Postdoctoral Advising Member ***2022***

Tucson-based task force of Arizona Science Policy Network ***2021-present***
co-organizer and member
Starting up a Tucson-based task force of the Arizona Science Policy Network, focused on advocating for science-based solutions to issues facing our communities.

Jogging Organization for Graduate Students (JOGs) ***2018-2019***
President
Co-founded a social running club for graduate students to network with fellow runners and researchers.

University of Notre Dame Graduate Student Union ***2017-2018***
Social chair and community engagement chair
Coordinated social and community engagement events for graduate students and families, including a Charity Gala. Served as a voting member of Notre Dame Graduate Student Union.

Society of Schmitt Fellows University of Notre Dame ***2015-2017***
Treasurer
Handled Society of Schmitt Fellows annual budget and co-organized a fund for conference presentation travel grants.

Social Chair
Co-organised monthly social activities for STEM graduate students.

Outreach Committee
Planned outreach events in the community.

Reviewer

Journals: Science, Ecosphere, Dendrochronologia, Scientific Reports, Forest Ecology and Management, Michigan Academician.
Proposals: National Science Foundation Biology Program, Joint Fire Science Program

COMMUNITY OUTREACH AND ENGAGEMENT

International Programs

Science Exchange with Honduras Institutio de Conservatión Forestal and USDA Forest Service ***January 2024***
Participated in discussions about capabilities of National Forest Inventory data in Honduras, sampling strategies, and the potential roles of tree ring data and National Forest Inventory data in meeting the challenges of climate, disturbances, and land-use changes.

Community Engagement

Reframing Wildfire ***March 2, 2023***
Co-lead and co-organized a community panel discussion featuring artists, scientists, local conservation organizations and the US Forest Service to discuss how we can meaningfully (re)frame the wildfire and

human interactions with the landscape. Acquired funding and support from the American Geophysical Union, Laboratory of Tree Ring Research, and Crooked Tooth Brewing Company.

Science on Screen at the Loft Cinema ***April 19, 2022***
Presented my research as an introduction to the film "The Hidden Life of Trees" to ¿300 attendees. This was a part of the Loft's Earth day film festival, and Science on Screen is sponsored by the Sloan Foundation the Center for Creative Photography.

Pine Chant: Collaboration with musicians and artists ***2021***
Contributed to an art-science collaboration between the UArizona School of Music, School of Art, the Center for Creative Photography, and the Laboratory of Tree-Ring Research. In this collaboration, tree ring data from National Forest Inventory plots were used as inspirations for a piece composed by Lachlan Skipworth, "Pine Chant", (Available on Spotify), and was performed by three wind instruments at the Laboratory of Tree Ring Research, Center for Creative Photography, Arizona-Sonora Desert Museum, University of Arizona School of Music, and the 2022 Conference of the International Double Reed Society. It was made possible by a University of Arizona Production Faculty Seed Grant and the College of Fine Arts Fund for Excellence. I contributed by discussing our research, providing tree ring data used to compose the piece, contributing the scientific interpretation of the data and generating simple visualizations (videos, charts). Watch a recording and see more information on Sara Fraker's website.

Macrosystems exhibit for Laboratory of Tree Ring Research lobby ***2020***
Helped to develop and create a series of outreach videos about our research forecasting forest responses to climate change, which is a permanent video exhibit in the Laboratory of Tree Ring Research lobby.

Southern Arizona Foresters ***2019***
Presented a research talk and led a discussion during the Southern Arizona Foresters Luncheon.

STEM Programming at the Boys and Girls Club of South Bend ***2016-2017***
Organized weekly science activities for elementary school students in the Boys and Girls Club after school program.

Planting Science Mentor ***2017-2018***
Mentored High School Science classes during independent research projects online.

Volleyball Head Coach ***2017***
Coached 6th grade girls volleyball team at St. Pius X School in Granger, IN.

Science Policy

Memo on the Filibuster on behalf of Union of Concerned Scientists ***July 2021***
Co-wrote a memo on the historical use of the filibuster, its misuses, and details potential outcomes of filibuster reform, as it relates to Senator Mark Kelly's policy objectives. This was a joint effort between members of the Arizona Science policy network, and was sent on behalf of the Union of Concerned Scientists.

AGU Broadening participation in STEM advocacy day ***June 2021***
Met with staffers from Raul Grijavla, Kirsten Sinema, and Senator Mark Kelly's office to ask for them to support several bills that would help broaden and diversify participation in STEM, including the RESTART STEM Act (S. 1297), the STEM Opportunities Act, and the Reconciliation in Place Names Act. This meeting was on behalf of American Geophysical Union.

AGU Voices for Science Advocacy Day ***May 2021***
Met with staffers from Raul Grijavla, and Senator Mark Kelly's office to ask for them to support increases in science funding for NSF and USGS in the FY 22 budget request. This meeting was on behalf of American Geophysical Union and the Voices for Science Program.

Meeting with policymakers to strengthen the role of science in democracy ***April 2021***
Met with Coral Evans (former Mayor of Flagstaff, and current staffer for Senator Mark Kelly) to discuss science policy, voting rights, and democracy. We thanked Sen. Kelly for his support of the For the People act, and spoke in support of the John Lewis VRA and the Environmental Justice for All Act. This meeting was on behalf of Union of Concerned Scientists.

Arizona Science Policy Day ***March 2021***
Led and organized a discussion of nature-based climate solutions to address the climate crisis, developed a one-pager to disseminate to Arizona Legislators, and engage with students interested in climate-related policies. This event was a part of Arizona Science Policy Networks Science Day

Organized meetings with policymakers for Climate Advocacy Week ***October 2020***
Led and organized a meeting with our Arizona Senators' offices (Kirsten Sinema[D], Martha McSally[R]) and our local House representative (Ann Kirkpatrick[D]) to discuss policy to address the climate crisis and offer our expertise as climate and planetary scientists. This event was a part of AGU's Climate Advocacy Week

HONORS, AWARDS, AND CERTIFICATES

Ecological Forecasting Award from the Ecological Society of Americas Statistical Ecology section *2022*

CIRTL Postdoc Pathway Fellows Program Certificate(Associate Level I Practitioner Level II) *2022*

American Geophysical Union Voices for Science Fellow *2021-2022*

Postdoctoral Professional Development Certificate *2020*

University of Arizona Postdoc Speed Talk Finalist *2020*

Saint Joseph Academy Alumni 25 under 35 Award *2016*

Distinction Award Biology Senior Exercise *2012*

TEACHING AND COURSE DEVELOPMENT TRAINING

Center for Integration of Teaching and Research Learning
University of Arizona – Fall 2021
Earned the the CIRTL Postdoc Pathway Fellows Program practitioner certificate, upon successful completion of an intensive one-year higher education teaching preparation program. This program involves a selective application process, a course on evidence-based STEM teaching, biweekly faculty learning community discussions, teaching workshops, and a collaborative co-teaching project.

Teaching Where the Magic Happens: Field Course Design Workshop
Ecological Society of America – August 2017
Attended a workshop to develop short field courses, discussed risk management, best teaching practices, and dealing with logistics while developing remote field-based learning experiences.

A Practical Guide to Teaching and Learning in STEM
University of Notre Dame Kaneb Center — January 2018
Participated in a workshop lead by Rebecca Brent and Richard Felder, focused on designing successful sciences courses with measurable learning objectives, active learning, and appropriate assessment.

Striving for Excellence in Teaching Certificate
University of Notre Dame Kaneb Center — March 2018
Participated in 5+ workshops on teaching and course design at University of Notre Dame, and provided reflections on how the workshops provided skills to improve my own teaching.

Wakonse Conference on College Teaching
May 24-29th 2018
Participated in the 2018 Wakonse Teaching Fellowship Conference in Michigan, where college educators share teaching methods, reflect on personal strengths and weaknesses as college teachers, and craft short- and long-term professional goals.

Introduction to Course Design University of Notre Dame Kaneb Center — Spring 2017
Participated in a 5-week workshop series to improve my course design and help develop teaching philosophy.

GET-STEM Program
University of Notre Dame Kaneb Center — Fall 2016
Volunteered in the Graduate Educators Teaching Science Technology Engineering and Math program.

OPPORTUNITIES CANCELED DUE COVID-19 AND OTHER DISASTERS

In addition to most of the conferences, seminars, and research collaborations moved online or delayed during my post-doctoral research, several engagement opportunities were cancelled, or otherwise impeded by the ongoing COVID-19 pandemic, and other disasters. I list these here:

Presented virtually at the Ecological Forecasting Initiative Conference 2024 due to COVID illness.

Invited Talk at the Forest Growth and Yield Innovations Conference 2022 in Canmore, Alberta, Canada. Conference was cancelled and rescheduled to 2023.

Invited Talk at Los Alamos Math Days at Los Alamos National Laboratory (May 2022) Conference rescheduled due to wildfire and evacuation notices near Los Alamos National Laboratory. I presented virtually due to illness.

Co-Instructor of Using Bayesian statistics in Dendroecology at North American Dendro-Ecological Fieldweek (NADEF), July 2020

Science Cafe Speaker at Tucson Festival of Books, March 2020
